A. E. MICHAEL,
A GOOD PLACE TO TRADE.

WHAT IS CREDIT?

+++ +++ +++

Credit is the expression of trust and belief in a man's ability to meet his financial obligations. In all human relations trust is the inspiration to larger accomplishments.

Credit is the power to obtain goods or service by giving a promise to pay money at a specified date in the future. Let us, therefore, understand at the very outset that after all credit is only as strong and as good as the person upon whom it places the obligation to make future payment.

In granting credit the three following factors

are always taken into consideration:

- 1--Character,
- 2--Capacity,
- 3--Capital.

The first factor, Character, is the most important. A man or woman with character does not attempt to purchase what he or she does not expect to pay for at the time agreed upon. Another point to impress upon one's self is that your credit rating does not depend upon how you CAN pay your bills, but how you DO pay your bills. From the foregoing statement you will see that—

Character Is the Basis of Credit. The bulk of the world's business is done on credit. Credit means confidence—Credit means Service when extended to you by your merchant, is an aim worthy of our attainment.

Short Accounts Make Warm Friends!

Think this over, and make every man your warm friend by paying your bills promptly.

Dr. Scholl's Toe-Flex

Corrects bunions by straightening the crooked toes. Relieves neural muscular action. Made of soft, antiseptic rubber. Very comfortable.

CLOSING NOTICES.

The business houses in Stony Plain close every Wednesday at 1 p.m. during July and August.

Stony Plain Postoffice will be closed Wednesday afternoon at 3 o'clock in July and Aug.

The three elevators in Stony will close Wednesday at 1 p.m. during July and August.

LOCAL NEWS.

Miss Emmie Fischer is spending a week with friends at Seba Beach.

Officer Smith returned yesterday from a vacation spent at Calgary. Mrs. Smith will remain for a short time longer.

Mr. McCulla returned to Stony Sunday morning.

Captain Pugh, well-known here, who has been Indian Agent at Saddle Lake I.R. for several years, has been promoted to Indian Agent at Cranford, Lake, Sask., with three reserves.

"Ruddy" Heichen, the Edmonton grainman, was in Stony over the week-end.

J. F. Clarke is driving a new Chevrolet car this week, as also is Pete Mashtaler; and Jack Ursel Jr. has one of those good new Stars.

Herman Loeblich, the well-known ball player, has gone to Youngstown, as a guest of Mr. Steckle's.

Owing to the absence from town of so many members of the local W.L. there will be no meeting in July of this association.

Entries for the Home Garden competition being conducted by the local W.L. close today.

Johnny Miller this week unloaded his fourth carload of Fords.

At the local court on Saturday last Gus Monvek was fined \$15 and costs or 30 days imprisonment for an assault on Pete Kumberger.

At St. Matthew's Church on Sunday last the infant son of Mr. and Mrs. Joe D. Miller was baptised—Melville Philip Henry. Rev. E. Eberhardt performed the rite. Following the ceremony, a party was held at the home of Mr. Miller's parents in Stony.

Down-town residents are regaled every evening by selections from the boy scouts band. Sunday evening the selections were Old Black Joe, Swanee River; winding up with Wearing of the Green, it being July 12th, the day sacred to "the glorious, pious and immortal memory of King William the Third, Prince of Orange."

Some good road work is being performed around Stony at present, among these being the much-needed improvement on the roadway from Gilbert's corner to St. Mat's school. The Meridian road north from the baseline is also now in good condition. As much cannot be said for the road north from Goerz's corner, as travellers say that the first mile up was better before it was "fixed."

Canadian Trade Prospects

With the close of the first six months of 1925, financial and commercial publications in Canada have been taking stock of the business situation throughout the Dominion. The conclusions reached by them as the result of careful surveys is that present conditions are better and prospects for the immediate future more promising than for some years past. This is especially true in regard to agriculture, and, as the West has always contended, a betterment in the farming outlook has a direct beneficial effect on manufacturing and all business.

Although actual returns from the farms are phenomenal until the crops are harvested, and it is never safe to gleefully estimate yields of grain and field crops until they are finally removed from all varieties of weather, plant diseases and pests, the fact remains that at the end of June prospects throughout Canada, and especially in the Western Provinces, were better than for many years and, in the absence of widespread and extremely adverse conditions before harvest, the outlook is for one of the best and most profitable crops in ten years.

One financial paper in its annual review at the end of June states; on the basis of reports from all the Provinces, that the biggest increase in employment in two years has taken place, with the result that, except in the larger cities where the unemployed always congregate, there are few idle men. Manufacturing industries are busier than for years and in Ontario and Quebec real activity prevails with manufacturing nearly at capacity in several lines and some plants working overtime.

Record catches of fish on both the Atlantic and Pacific seaboard have taken place, immigration is increasing, the summer tourist traffic shows every indication of attaining a new high record, while the export trade of the Dominion continues to increase both in volume and value month by month. Building construction is likewise much greater than a year ago. Railway car loadings are smaller, but this is accounted for in two items, the smaller volume of last year's grain crop and reduction in the movement of coal resulting from labor troubles at the mines. On the other hand, there is a substantial increase in car loadings of manufactured articles and general merchandise, while this year's grain crop promises to more than offset the reduced volume of a year ago.

One of the significant developments is the steadily rising volume and value of Canada's export trade. For some years now the Dominion Government has been quietly negotiating trade treaties with other countries. One of the latest was with Australia and already British Columbia is looking forward to and preparing for a big expansion in trade with that sister Dominion. Before this article appears in print it is expected that the terms of a new trade arrangement with the British-West Indies will be announced. Inasmuch as each and every one of these retrograde agreements provides for the removal of artificial restrictions on trade through the lowering of customs duties and the wiping out of other obstacles to the free exchange of commodities, and are frequently accompanied by the provision of larger and improved facilities of communication and transport, the effect cannot be otherwise than to greatly enlarge Canada's markets abroad, and, as repeatedly urged in this column, that is exactly what a young and producing country like Canada requires. Freer trade and wider markets are bound to bring about the Dominion's development leading to increased employment and production and resultant prosperity and growth in wealth.

A young country like Canada, with a comparatively small population, but huge resources and productive powers, and producing far more than its own people can consume, and already possessing manufacturing and other industries with capacities for production far in excess of the needs of home population, stands in need, not so much of protection of that restricted home market, but the removal of obstacles to trade with the world. We cannot grow strong and wealthy by merely trading with ourselves; that is too much a case of trying to lift oneself by the boot straps. Strength and wealth will come through producing for sale abroad, thus bringing into Canada the wealth derived through the sale of our products abroad.

6,000 Miles of Roads

"The province of Quebec now has 6,000 miles of modern improved roads, including a complete system of main trunk highways and county or market roads, and a large number of local roads," says the Quebec official bulletin of the roads department. "These 6,000 miles of roads represent thirteen years of strenuous and sustained work. They cost, in construction, repair and maintenance, over \$60,000,000."

The Canadian Arctic

The merest glance at the map, or better at a globe, shows that if commercial aviation fulfils the hopes of its promoters the great intercontinental air lanes will lie in the far north. Siberia and Alaska will both have great "Empires," and so will any island found further north, even if it is only big enough to provide a filling station and enough level ground for an aviator to alight and take off. Springfield Republican.

CHILDREN CRY FOR

Fletcher's CASTORIA
MOTHER:—Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Purgative, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of *Dr. J. C. Fletcher*. Proven directions on each package. Physicians everywhere recommend it.

How Germany Solves

Housing Problem

Families Allocated Space According To Number Of Members

They have a speedy method of solving the housing problem in Germany, according to an English paper, which says:

"You have here a flat of eight rooms; you are three in family. You will live, in future, in three rooms. Another family will move in next week to occupy the other five rooms. Good morning."

What would a British (or Canadian) householder say if an official said such a thing to him, and if he knew that he could neither protest nor refuse?

Yet that is what happens in Berlin every day. Next time we are inclined to grumble at bad conditions in our own country, it may help us to be more contented if we realize what the Germans put up with.

Rents are adjusted according to the number of rooms occupied in a house or flat. Thus, the family using five rooms in an eight-roomed house—while the original tenant inhabiting the other three rooms—will pay five-eighths of the rental.

NATURE'S WARNINGS

Danger Signals That Everyone Should Take Seriously

Pain is one of Nature's warnings that something is wrong with the body. Indigestion, for instance, is characterized by pains in the stomach, and often about the neck; rheumatism by sharp pains in the limbs and joints; headaches are a sign that the nerves or stomach are out of order. In some ailments, such as anaemia, pain is not so prominent. In this case Nature's warning takes the form of pallor, breathlessness after slight exertion, palpitation of the heart, and loss of appetite. Whatever form these warnings take, wise people will not ignore the fact that many diseases have their origin in poor blood, and that when the blood is enriched the trouble disappears. Dr. Williams' Pink Pills are most helpful in such cases because they purify and build up the blood to its normal strength. In this way it tones up the nerves, restores the appetite and gives perfect health. Miss Hazel Bernt, of Arnprior, Ont., has proved the great value of this medicine and says:—"I am a young girl and have been working in a factory for the past four years. For two years I had been in such poor health that at times I could not work. I was thin and pale, and troubled with headaches and fainting spells. I doctored nearly all this time, but it did not help me. My mother advised me to take Dr. Williams' Pink Pills, and after using them for a while I could notice an improvement in my condition. I used nine boxes and can truthfully say that my health is restored. When I began taking these pills I weighed 87 pounds and now I weigh 114. I feel that I owe my good health to Dr. Williams' Pink Pills and hope other ailing people will give them a fair trial."

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

World's Smallest Yacht

At the "Temple of the Brave" a memorial to George East, England, of the memory of yachtsmen killed in the Great War, is to be found the smallest model yacht in the world. It weighs three grains, and is not as long as a man's thumb.

The cheapness of Mother Graves' Worm Exterminator puts it within reach of all, and it can be got at any drugstore.

Soviet Denies Intrigues

Would Avoid Any Action Which Could Be Regarded as Intervention in China

Foreign Minister Tchitcherine has issued a statement declaring that while the sympathies of the Russians are on the side of the Chinese in their struggle for complete liberation from foreign domination, the Soviet Government's policy is to avoid any action which could be regarded as intervention in China's internal affairs.

The statement was prompted by attacks upon Soviet Russia in the English newspapers in connection with the present situation in China. The foreign minister denies that Soviet Russia is carrying on intrigues in China against British trade or against foreigners in general.

You never can tell. Some people claim so high they never hit anything on earth.

New Livestock Organization

Animal Husbandry Men of Western Canada Form Association

Animal husbandry men of western Canada have formed themselves into an organization affiliated with the Canadian Society of Technical Agriculturists. The society has been formed for the purpose of co-ordinating and checking up the experimental work that is being carried on. It is probable that a similar society will be formed in the east, and their work will be united through the C.S.T.A. In the meantime a provisional executive will take charge of the organization, and the first annual meeting will be held in Winnipeg next Christmas at the same time as the western agronomists convene.

The organization will include the Dominion experimental farm superintendents on the prairies, the animal husbandry men of the three universities, the three livestock commissioners and one or two others who are doing a certain amount of investigation work, including C. M. Leonard, superintendent of institutional farms for Saskatchewan, and G. H. Hutton, of the C.P.R. agricultural department. The provisional committee of the new organization includes: N. J. Tince, representing Manitoba; W. R. Gibson, representing Saskatchewan; F. H. Reed, Lacombe, secretary; P. Sackville, University of Alberta, is chairman.

Use Miller's Worm Powders and the battle against worms is won. These powders correct the morbid conditions of the stomach which nourish worms, and destroy the parasites which cannot exist after they come in contact with the medicine. The worms are speedily on their way, with other refuse from the bowels. Soundness is imparted to the organs and the health of the child steadily improves.

Brought Millions To Canada

Since the British cattle embargo was lifted on April 1, 1925, 195,859 head of cattle had been shipped to Great Britain up to May 21 last, and the estimated value to Canada of these exports is \$14,125,715. This was stated in the commons in answer to a question.

Scientists, who are tracing future paths of earthquakes, state that America is safe, owing to the great depth of the mountainous land formations.

The Professional Farmer

Farmer Must be a Specialist Highly Educated in His Business

That slack farming methods do not pay is generally accepted; but that slack farming methods are a waste of national assets and an injury to the landless population must be a creed of the future. Already there are abundant signs that the farmer must be a scientist highly educated in his business and understanding to the last point the natural forces which he calls into play. As such he will take his place as a professional man—the most highly respected professional man of all—Sydney Bulletin.

Powerful Medicine.—The healing properties in six essential oils are concentrated in every bottle of Dr. Thomas' Electric Oil, forming one of the most beneficial liniments ever offered to the use of man. Many can testify as to its power in alleviating pain, and many more can certify that they owe their health to it. Its wonderful power is not expressed by the small price at which it sells.

Another Title For Prince

The latest title granted to the Prince is that of "Alvural Diamond Digger." An official certificate entitling him to this honor was presented by the "Digger's Committee" of West Barkly. He was somewhat amused when he was informed by the committee that the certificate is accorded "only to persons of indubitable honesty."

Minard's Liniment for Neuralgia

Amazing, But True
It's a most amazing thing, but if you tell a man that there are 326,247,518,214,327,216 stars in the sky, he will accept it as a fact. But if you put up a notice saying: "Wet Paint," he has to go and dab it to see if it's true.

Keep Your Shoes Neat

2 IN 1

WHITE Shoe Dressing

CAKE OR LIQUID

(Heft It Once!)

Then You Will Want One for Your Own Kitchen

The very feel of it will make you want to own it. It balances so nicely, seems to be just right. The handle is rigid and does not tip around like a hinged handle. That means no slipping, scalded hands or accidents. See how you fill it! You lift the hinged lid and can fill it right under the tap or by dipper because the opening is at the side, not the centre. Most important, there are no up-and-down motions like the old fashioned kettle.

SMP ENAMELED TEA KETTLE

Assisting Agriculture By The Selection Of New And Better Varieties Of Wheat

About the year 1842, David Fife, farming in Ontario, Canada, was New Ontario—procured from a friend in Glasgow, Scotland, some seed wheat, says The Saskatchewan Farmer. Mr. Fife did not know it, but this wheat had been part of a cargo from Dunzig, a Russian wheat, not grown in Scotland and of course unknown in Canada. Mr. Fife liked the looks of the wheat and sowed a large acreage from his first year's crop.

This wheat did so exceptionally well on Mr. Fife's farm that neighbors wanted some seed and called the wheat Fife wheat. Since it was the staple variety all over Canada and in the northern states until Marquis, a daughter of Red Fife, pushed her parent off the wheat throne.

Paul Gerlach, a farmer in the Saskatoon district, noticed a field of some of these unnamed varieties which seemed to him so much superior to the rest of the crop that he secured a small quantity of the seed and gave it to the University of Saskatchewan. Paul Gerlach is dead, but the Gerlach out, which outyielded any crop grown on the university farm, will preserve Gerlach's memory and his public spirit.

These two men were farmers with the scientific point of view, and the contribution they made to agriculture was very great, but there was something accidental and fortuitous about the way in which they became public benefactors.

At the University of Saskatchewan thousands upon thousands of crosses have been made with wheat for the purpose of developing, if possible, some variety that will be highly resistant to rust and will in addition have the good qualities of Marquis wheat. Some of these crosses have been quite resistant to several strains of rust. This is not enough for the scientists who are in charge of the experiments. They keep on hunting for fresh strains of rust and if any are found which attack the new wheat, it is rigidly and ruthlessly discarded unless it shows sufficient promise to be used for further crosses. Some day either at the University of Saskatchewan or at some other university, a rust resistant wheat will be developed and the discovery of such a wheat will more than pay the country for all and more than all that it would take to run all our universities for the next hundred years.

Yellow Corn As Chick Feed

Gives More Nutrition Than Any Other Grain

Heat and vitamins A, two factors required in chick nutrition, are present in yellow corn to a greater degree than in any of the grains commonly used. Hence yellow corn can be used extensively in chick feeding with every assurance of success. Oats, barley, wheat, white corn do not contain vitamins A, to a considerable quantity, so are not now considered to the same class as yellow corn when used as chick feeds. A ration made up of eighty pounds of yellow corn meal, twenty pounds wheat middlings, five pounds raw linseed meal, five pounds pearl grit, and one pound-salt, mixed as a mash and fed dry from hopper or pan, will give excellent results providing liberal quantities of skin milk and clean fresh water are also supplied. Direct sunlight will complete it.

The Beat of the Pain

Little Natalie complained that she found it painful to swallow and her mother was worried about it. Are you now your throat, little girl, you asked. "You must just what the pain is."

"My tongue hurts where it was put in," replied Natalie.

No Favoritism

Mrs. "Dad, Mary's got married 21 years old and ought to get married."

Mr. "Take your time, let her wait for the right man."

Mrs. "Favoritism! What! Why should she? I didn't."

The first circulating library of which there is any record was established at Dumfermline, Scotland, in 1711.

Manitoba Peony Farm

Fifteen Thousand Plants Growing On Six Acres of Land

Just north of Portage la Prairie is to be found one of the most beautiful spots in western Canada—the peony farm operated by Alex Wilson and his two sons. During the season for the cutting of these magnificent flowers, hundreds of carloads of people from Winnipeg and other parts of the province, who are aware of the existence of Mr. Wilson's grounds, visit the farm. Here is found a blase of color—a basket of bloom covering approximately six acres. It is 15 years since Mr. Wilson planted a solitary root of peony on his land one mile north and one mile east of Portage.

Fifteen years ago, finding the peony thriving well on the plain, Mr. Wilson decided to give more space to its cultivation. Today he has 15,000 plants from which he cuts thousands of blooms for the Winnipeg market daily. His shipments to the city, however, only represent part of the output of the farm, the blossoms going to all parts of the west. Starting with the late-fashioned variety of peony, on a farm today can be found scores of different types and colors, from the pure white to the deep red.

Mr. Wilson, although he has now developed a thriving industry, is as enthusiastic a horticulturist as in the days when he planted his first peony root, and visitors to his beautiful home find him and his wife and sons keenly anxious to show their callers all the grandeur that is to be found on six acres of bloom. He is devoted to this flower. Adding to the beauty of the grounds are dozens of different species of perennials. Mr. Wilson, furthermore, has gone extensively into the seed growing business, and last year has seven acres of garden peas, seven acres of hemp and seven acres of beans, which he is growing for seed.

Preserving and Storing Eggs

Guarantee Process Has Been Found to Be Most Satisfactory

A series of experiments testing the new "Guarantee" process of preserving eggs have been conducted at the central experimental farm. Different methods of storing eggs for winter use were also investigated. The results of the tests are given in detail in the 1924 report of the Dominion poultry husbandman, distributed by the publications branch, department of agriculture, Ottawa.

During the experiments extending over two years the eggs treated by the "Guarantee" process, which consists in dipping them in a boiling solution of wax and oil, graded much better than the untreated ones and had a decidedly better flavor. Other important points brought out by the tests are that eggs should be stored with the small ends down, that they should be as fresh as possible, that clean eggs keep better than either dirty or washed ones, and that they should be stored in clean flats and fillers.

Agriculture in Saskatchewan

Agricultural Products in 1924 Were Valued at \$281,992,000

By far the largest industry in Saskatchewan, is agriculture. In 1924 the products of agriculture in Saskatchewan were valued at \$281,992,000. The production consisted of the following:

Field crops	\$227,310,000
Farm animals	13,660,000
Forest products	10,000,000
Dairy products	26,000,000
Fruits and vegetables	2,100,000
Poultry and eggs	2,750,000
Clover and grass seed	180,000

The gross agricultural wealth of the province in 1924 was \$1,848,415,000, of which the principal items were: Land, \$877,042,000; buildings, \$216,358,000; implements, \$176,976,000; livestock, \$124,518,000.

Grain Loadings Higher

Farmers are taking advantage of the slack spot following seedling to haul their grain, and loadings at country elevators along Canadian National lines have been climbing rapidly during the past few weeks. The week ending June 1st saw 7,329 cars, containing 1,940,460 bushels, loaded at C. N. points, and the week's loadings amounted to 1,509,000 bushels with 1,700,000 bushels still in store.

London grain says 170 pairs of stock-ings are reasonable. "We say they would be for a centipede."

Important Part Played By The Weekly Newspaper In Development Of Canada

Egg-Laying Contest

To Encourage and Improve the Breeding of Poultry

During the week of 1923-24 twelve egg-laying contests were conducted by the poultry division of the central experimental farm. A Canadian contest was held at Ottawa, and the other eleven were provincial. These contests, which have been carried on since 1919, are intended to encourage and improve the breeding of poultry along lines of egg production, to provide reliable information for breeders and a medium of qualification for the registration of poultry. According to the 1924 report of the Dominion poultry husbandman the contests have brought about a remarkable improvement in the breeding of poultry and have done much to stabilize the industry in Canada. The increase in production between the first and fifth years of the contests is 27 eggs per bird. The report, which is distributed by the publications branch, department of agriculture, Ottawa, gives a detailed account of the 1923-24 contests in which 3,610 hens took part and laid an average of 168.6 eggs per hen. One bird in the Nova Scotia section laid 312 eggs in 52 weeks. A total of 1,051 birds laying 500 and over, 753 qualified for registration.

Reindeer Industry

To Be Re-organized

Hudson's Bay Company Sending Seattle Men to Barren Land

W. T. Lopp, until recently chief of the Alaskan division of the United States bureau of education, in which service he spent 35 years, has been engaged by the Hudson's Bay Company to re-organize its reindeer industry in Barren Land, northeastern Canada. He will spend a year in this service.

Lopp, who has left for his mission in the isolated Arctic area, will inspect the progress of a herd of 700 reindeer, which was sent to Barren Land four years ago by Hudson's Bay officials, at the suggestion of Stefansson, the explorer. The Seattle man will investigate the possibilities of establishing the deer industry on a firm basis in this far northern frontier.

Agriculture in Britain

Says the Farmer Must Rely On His Own Strong Right Arm

Premier Baldwin's recent intimation to agriculture that it must not look for any greatly increased assistance from the state, was put more plainly by Lord Bledisloe, minister of agriculture, speaking in Lancaster, when he said: "If the agriculturists look to the government to perform wonders for their industry they will be bitterly disappointed. The most the government can do is to see that the agriculturists have a fair field."

The British farmer, he continued, would achieve his own salvation with his own strong right arm and not because the government was out to provide him with artificial remedies.

Alberta Wheat Production

Average Yield For Thirteen Years Given As Nineteen Bushels to the Acre

A statement just published by the province of Alberta shows the remarkable advance which is being made in wheat production. In 1906 the Alberta wheat crop was less than six million bushels; in 1923 it was more than 144 million bushels. The figures for a number of years in this period are as follows:

1906	Bushels	5,930,000
1911		36,002,000
1916		68,805,000
1919		81,461,000
1923		144,518,000

The average yield of spring wheat for a period of thirteen years is given as nineteen bushels to the acre.

Too Common

"Mr. Ruddy, do you say you want another doctor?"

Mrs. Ruddy—"Oh, we are entirely too wealthy to have a doctor tell us to go on a diet and take physical exercise."

The Natural Resources Intelligence

service of the department of the interior at Ottawa, says:

Canadian weekly newspaper men have just concluded their annual convention at Winnipeg, and have discussed fully the many problems which the weekly newspaper has to meet. The weekly is undoubtedly very close to the heart of its readers, and in meeting a want that can be supplied from no other source. Particularly is this the case in many of our newer settlements, where the discovery of new natural resources or the development of others is taking place. Many of what are today Canada's most progressive towns and villages owe their inception to the opening up of mineral developments, such, for instance, as those in northern Ontario, while the exploitation of the forests and the harnessing of waterpowers has established settlements in all the provinces of Canada. Into these places have gone enterprising editors to establish newspapers to meet the needs of the settlers.

Development of natural resources has thus been the means of creating many locations for the weekly paper. The protection of these natural resources thus naturally becomes of deep interest to the weekly publisher, as without these the settlement could not survive. Many villages and towns have as their principal support one or more of the industries dependent for their raw materials upon natural resources; while the surrounding farming areas have increased the circulation field for the local paper. The weekly press is giving its support to the development of Canada and her natural resources. In turn, therefore, the weekly newspaper is deserving of and should receive the support of the business interests and individuals of its local field.

Farming Operations In

Manitoba Are Changing

Increase in Showing of Dairy Cattle At Provincial Fair

Manitoba Provincial Fair at Brandon, shows a rapid increase in dairy cattle, sheep and swine this year that may be taken as indicative of the steady change that is taking place in the character of farming operations in the province.

Year after year the showing of dairy cattle has been on the upward trend and this year the exhibit of these classes was the best in the history of the fair.

Even though the fat breeds of hogs were eliminated from the prize list the entries of other varieties was far in advance of former years. The showing of sheep was so large that extra pens had to be erected to accommodate them.

Suitable For Sheep

East: Kootenay Country, B.C.

Especially Adapted For Industry

According to Arthur Morison, of the Dominion livestock branch, the East Kootenay country of British Columbia is especially suited to sheep raising. Though at the present time there are only about 1,300 sheep in the district, many are arranging to increase their flocks. So far, little loss has been experienced from coyotes which, in many districts, have proved such a pest for sheep men. The breed chiefly favored is a cross between the Oxford and Shropshire, which makes a superior dual-purpose animal.

Curing Cataract Without Operation

Cataract, that dread disease of the eye, does not, necessarily, in most cases, require operation, declared Dr. J. T. Ruddy, of Los Angeles. Dr. Ruddy affirmed that cataract taken at an early stage can be cured by preliminary surgery and the use of the oculo-lens, an instrument the doctor himself invented.

Used The Gold Plate

On Derby night King George on (retained his friends of the Jockey Club at dinner at Buckingham Palace and the gold plate service was used. Queen Mary went out to a private party of her own. Derby night is the one night of the year when the King entertains as a bachelor.

A Romance of the Spanish Main CAPTAIN BLOOD BY RAFAEL SABATINI

Copyright, 1932, by Rafael Sabatini.
"CAPTAIN BLOOD," a Viapograph picture with "Warner Kervin" in the title role, is an adaptation of this thrilling novel.

CHAPTER XXVII.—Continued
And their own they made her in the end, and at cost of nearly half their numbers. Driven to the quarter-deck, the surviving defenders, urged on by the infuriated Rivaro, maintained awhile their desperate resistance. But in the end, Rivaro went down with a bullet in his head, and the French remnant, numbering scarcely a score of whole men, called for quarter.

Even then the labors of Blood's men were not at an end. The Elizabeth and the Medusa were tight-locked, and Hagthorpe's followers were being driven back aboard their own ship for the second time. Prompt measures were demanded. Whilst Pitt and his seamen bore their part with the sails, and Ogle went below with a gun-crew, Blood ordered the grapples to be looked at once. Lord Willoughby and the Admiral were already aboard the Victoreuse. As they swung out to the rescue of Hagthorpe, Blood, from the quarter-deck of the conquered vessel, looked his last upon the ship that had served him so well. A moment she rocked after her release, then slowly and gradually settled down, the water gurgling and eddying about her topmasts, all that remained visible to mark the spot where she had met her death. As he stood there, above the ghastly shambles in the wast of the Victoreuse, someone spoke behind him. "Captain Blood, never before have I seen the impossible made possible by resource and valor, or victory so gallantly matched from defeat."

He turned, and presented to Lord Willoughby a formidable front. His head-piece was gone; his breastplate dented, his right sleeve a rag hanging from his shoulder about a naked arm. He was splashed from head to foot with blood, and there was blood from a scalp wound that he had taken mending his hair and mixing with the grime of powder on his face to render him unrecognizable.

But from that horrible mask two wild eyes looked out preternaturally bright, and from those eyes two tears had ploughed each a furrow through the filth of his cheeks.

CHAPTER XXVIII.

His Excellency the Governor

It was not until the evening of the following day that van der Kuylen's triumphant fleet of nine ships came to anchor in the harbor of Port Royal, and its officers, Dutch and English, were made acquainted with their admiral's true opinion of their worth.

His ships of that time were instantly refitted for sea. There were other

MISERABLE AND ALWAYS IN PAIN

Lydia E. Pinkham's Vegetable Compound a Dependable Help for Mothers

Port Greville, Nova Scotia.—"I took your medicine for a terrible pain in my side and for weakness and headaches. I seemed to bleed all over, too, and my feet and hands were the worse. I am the mother of four children and I am nursing my baby—the first one of four I could nurse. I took Lydia E. Pinkham's Vegetable Compound before the baby's birth, so you can see how much it helped me. I cannot praise it too highly for what it has done for me. I took all kinds of medicine, but the Vegetable Compound is the only one that has helped me for any length of time. I recommend it to any one with trouble like mine and you may use my letter for a testimonial."—Mrs. ROBERT McCOLLIE, Port Greville, Nova Scotia.

Before and after childbirth the mother will find Lydia E. Pinkham's Vegetable Compound a blessing.

Many many letters are received giving the same sort of experience as is given in this letter. Not only is the mother benefited, but these good results pass on to the child.

No harmful drugs are used in the preparation of this medicine—just roots and herbs—and it can be taken in safety by the nursing mother.

88 out of every 100 women reported benefit from its use in a recent campaign among women users of this medicine. C

W. N. U. 1665

West Indian settlements demanding the visit of inspection of the new Governor-General, and Lord Willoughby was in haste to sail for the Antilles. "And meanwhile," he complained to his admiral, "I am detained here by the absence of this fool of a Deputy-Governor."

"Ah! But did it not necessary you remain for that. And meantime the French will hat their eye on Barbadoes, which is not well defended. You half here chust the man you want. He will require no instructions, did one. He will know how to make Port Royal safe, better nor you or me."

"You mean Blood?" Egan! I had thought of it! and, rip me, why not?" Blood was sent for. He was a trifle dazzled by the honor proposed to him, when Lord Willoughby made it known. It was so far beyond anything that he had dreamed, and he was assailed by doubts of his capacity to undertake so onerous a charge.

"Dumme!" snapped Willoughby, "should I offer it unless I were satisfied of your capacity? If that's your only objection—"

Captain Blood sees the enemy.

"It is not, my lord. I had counted upon going home, so I had. I am hungry for the green lanes of England." He righted. "There will be apple blossoms in the orchards of Somerset."

"Apple blossoms!" His lordship's voice shot up like a rocket, and cracked on the way. "What the devil's apple blossoms!" He looked at van der Kuylen. The admiral raised his brows and pursed his heavy lips. His eyes twinkled humorously in his great face.

"So!" he said. "Fery boedig!"

"My lord wheeled forcibly upon Captain Blood.

"If you want your past forgotten and your future assured, this is your chance. Your duty lies here, at least for as long as the war lasts. When the war's over, you may get back to Somerset and cider or your native Ireland and its potatoes, but until then you'll make the best of Jamaica and run."

Van der Kuylen, exploded into laughter. But Blood remained solemn to the point of grimaces. His thoughts were on Miss Bishop, who was somewhere here in this very house in which they stood, but whom he had not seen since his arrival. Had she not shown him some compassion?

And then the rasping voice of Willoughby cut in again, upbraiding him for his hesitation, pointing out to him his incredible stupidity in trifling with such a golden opportunity as this. He stiffened and bowed.

"My lord, you are in the right. It shall be as you wish; and very gratefully, let me assure your lordship. I shall know how to earn his majesty's approbation. You may depend upon my loyal services."

Thus it was settled. Blood's commission was made out and sealed in the presence of Mallard, the commander.

"We sail tomorrow morning," his lordship announced. Blood was startled.

"And Colonel Bishop?" he asked.

"He becomes your affair. You are now the Governor. You will deal with him as you think proper on his

return. Hang him on his own yardarm. He deserves it."

"Isn't the task a trifle invidious?" wondered Blood.

"Very well. I'll leave a letter for him. I hope he'll like it."

Captain Blood took up his duties at once. With the sanction of Lord Willoughby, he marshalled his buccanniers and surrendered to them one-fifth of the captured treasure, leaving to their choice thereafter either to depart or to enrol themselves in the service of King William.

A score of them elected to remain, and amongst these were Jeremy Pitt, Ogle and Dyke, whose outlawry, like Blood's, had come to an end with the downfall of King James. They were—saying old Wolverstone, who had been left behind at Cartagena—the only survivors of that band of rebel-comet who had left Barbadoes over three years ago in the Cien Ligas.

On the following morning, whilst van der Kuylen's fleet was making finally ready for sea, Blood sat in the spacious white-washed room that was the Governor's office, when Major Mallard brought him word that Bishop's homing squadron was in sight.

"I am glad he comes before Lord Willoughby's departure. The orders, Major, are that you place him under arrest the moment he steps ashore."

Peter Blood sat back in his chair and stared at the ceiling, frowning. Came a tap at the door, and an elderly negro slave presented himself. Would his excellency receive Miss Bishop? He sat quite still, conscious that his pulses were drumming in a manner wholly unusual to them. Then quietly he assented.

He rose when she entered, and if he was not as pale as she was, it was because his lat dissembled it. For a moment there was silence between them, as they stood looking each at the other. Then she moved forward, and began at last to speak, haltingly, in an unsteady voice, amazing in one usually so calm and deliberate.

"I . . . I . . . Major Mallard has just told me . . ."

"Major Mallard exceeded his duty," said Blood, and because of the effort he made to steady his voice it sounded harsh and unduly loud. "You alarm yourself without reason, Miss Bishop. Whatever may lie between me and your uncle, you may be sure that I shall not let the example he has set me. I shall not abuse my position to prosecute a private vendetta. On the contrary, I shall abuse it to protect him. Lord Willoughby's recommendation to me is that I shall treat him with leniency. My own intention is to send him back to his plantation in Barbadoes."

She came slowly forward now. "I . . . I am glad that you will do that. Glad, above all, for your own sake." She held out her hand to him.

He considered it critically. Then he bowed over it. "I'll not presume to take it in the hand of a thief and a pirate," said he bitterly. (To be continued)

Riders of the Plains

We do not suppose there are enough of the Cavalier Mounted Police to cover every foot of territory in the Dominion. And yet the Canadian Mounted is known as one of the finest law-enforcing agencies in the world.—Indianapolis News.

Men don't actually fall because they knock; they knock because they have failed.

OH! MY BACK!

MINARD'S
"KING OF PAIN"
LINIMENT

Your Option

More than half the disease and sickness attending civilization and over-crowding our hospitals might easily be prevented if men and women would, on their own account, exercise something approaching the knowledge and skill which they lavish upon their curf and domestic animals. They study and discuss with each other the pros and cons of the minutest detail connected with obtaining maximum efficiency of the machines they ride in, while countless volumes from the pens of eminent authorities are poured over in exhaustive search for the best procurable information regarding correct feeding and care of horses, cattle, poultry, dogs and cats.

With both man and beast "the blood is the life" and the composition of the blood is dependent upon the nature of the food supplied the digestive organs. The body of every living creature contains sixteen elements. Like elements exist in fertile soil and in the tissues of healthy plants and the human body can only be maintained in health by a requisite supply of all these essential elements which, in variety and perfection, are bountifully provided by Nature.

The degree of civilization have increased to an alarming extent by the refinement of natural foods to the practical extraction of the organic salts essential to the production and maintenance of a good condition of the blood. Man is the only creature known to destroy the health-preserving values of his food.

For example, white flour is produced by the extraction of three-fourths of the mineral salts and colloids from the wheat, including the salts of phosphorus, sulphur, calcium, potassium, iron, chlorine, fluorine, magnesium, manganese, etc. Hence, the author, Alfred W. McCann, justifiably terms white bread "a foodless food." The boiling of vegetables dissolves most of their precious mineral salts. All vegetables which require cooking should be cooked by steaming. Cookers or steamers, of various makes, can be bought which allow vegetables to cook without loss of salts. Such steamers are economical—saving fuel and space, as several saucapans are fitted one above the other—1 pudding, 2 potatoes, 3 vegetables or roots, 4 meat, poultry or fish.

Excessive consumption of white sugar and all forms of preserved fruits and starchy foods produce such maladies as catarrh, hay-fever, asthma, rheumatism, arthritis, heart disease, etc., the body no longer retaining its normal alkalinity of the blood, the nature of the ensuing disease largely depends on the inherited tendencies of the subject.

Originally endowed with sound constitutions, men and women may, with apparent impunity, defy Nature's laws and requirements regarding their diet for years, but, for such defiance, Nature will sooner or later exact commensurate penalties.

Only in recent years has the subject of correct rational diet occupied the public attention, but with the knowledge easily obtainable concerning this vitally important matter, it has now literally become your option to forthwith commence making long due restitution to your body or to look forward to such physical pains and penalties as will be demanded by Nature for your past neglect before your premature death terminates the healthy life which still belongs to you if you wish to retain enjoyment of your most valuable possession.

The fact that the uncivilized races, which live naturally, are unacquainted with almost all the fashionable, but nevertheless fatal, diseases of civilization, emphasizes the truth of the statement that the further we depart from Nature's inviolable laws regarding our food, the quicker we create trouble for ourselves in the form of self-inflicted diseases, naturally resulting from our insistence upon refinement and sophisticated cooking. 1688 A.D., George Herbert made a statement which has not yet been contradicted: "Whatsoever was the father of the disease, An'll die was the mother."

Hoping that mental digestion of these lines will result in greatly improved health and happiness of their readers. Yours sincerely, CHARLES WALTER, 51 Brunswick Avenue, Toronto.

Dogs cannot be landed in Great Britain unless a license has been previously obtained from the board of agriculture in London.

"Whatsoever was the father of the disease, An'll die was the mother." (Herbert). "Without health life is not fit life is lifeless."

CANCER

Cancer and obesity—the two scourges of all other civilized diseases—may be cured by the use of THE CANTASIMM TREATMENT. This new method has been tried in its success against Cancer and Obesity, and has been found to be a sure cure. A book fully explaining this wonderful HOME TREATMENT and its success will be FREELY MAILED TO YOU ON APPLICATION. Send twenty-five cents at once, and be independent of surgery.

Empire's Finest Baby

Calgary Mother and Baby Awarded

First Prize at Wembley

The champion mother and baby in the empire's mother and baby competition at the British Empire exhibition, Wembley, are Mrs. MacDonald, 730 Eighteenth Ave., West, Calgary, Alta., and John Duncan Claude MacDonald. Announcement of Mrs. MacDonald and her child winning the prize was made at Wembley recently. The first prize in the competition, which has been won by Mrs. MacDonald with her baby, is an endowment policy of £100 and £20 in cash.

RED HOT JULY DAYS HARD ON THE BABY

July—the month of oppressive heat, red hot days and sweltering nights; is extremely hard on little ones. Diarrhoea, dysentery, colic and cholera infantum carry off thousands of precious little lives every summer. The mother must be constantly on her guard to prevent these troubles, or if they come on suddenly to fight them. No other medicine is of such aid to mothers during the hot summer as is Baby's Own Tablets. They regulate the bowels and stomach, and an occasional dose given to the well child will prevent summer complaint, or if the trouble does come on suddenly still banish it. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

1678-1679, 1680-1681, 1682-1683, 1684-1685, 1686-1687, 1688-1689, 1690-1691, 1692-1693, 1694-1695, 1696-1697, 1698-1699, 1700-1701, 1702-1703, 1704-1705, 1706-1707, 1708-1709, 1710-1711, 1712-1713, 1714-1715, 1716-1717, 1718-1719, 1720-1721, 1722-1723, 1724-1725, 1726-1727, 1728-1729, 1730-1731, 1732-1733, 1734-1735, 1736-1737, 1738-1739, 1740-1741, 1742-1743, 1744-1745, 1746-1747, 1748-1749, 1750-1751, 1752-1753, 1754-1755, 1756-1757, 1758-1759, 1760-1761, 1762-1763, 1764-1765, 1766-1767, 1768-1769, 1770-1771, 1772-1773, 1774-1775, 1776-1777, 1778-1779, 1780-1781, 1782-1783, 1784-1785, 1786-1787, 1788-1789, 1790-1791, 1792-1793, 1794-1795, 1796-1797, 1798-1799, 1800-1801, 1802-1803, 1804-1805, 1806-1807, 1808-1809, 1810-1811, 1812-1813, 1814-1815, 1816-1817, 1818-1819, 1820-1821, 1822-1823, 1824-1825, 1826-1827, 1828-1829, 1830-1831, 1832-1833, 1834-1835, 1836-1837, 1838-1839, 1840-1841, 1842-1843, 1844-1845, 1846-1847, 1848-1849, 1850-1851, 1852-1853, 1854-1855, 1856-1857, 1858-1859, 1860-1861, 1862-1863, 1864-1865, 1866-1867, 1868-1869, 1870-1871, 1872-1873, 1874-1875, 1876-1877, 1878-1879, 1880-1881, 1882-1883, 1884-1885, 1886-1887, 1888-1889, 1890-1891, 1892-1893, 1894-1895, 1896-1897, 1898-1899, 1900-1901, 1902-1903, 1904-1905, 1906-1907, 1908-1909, 1910-1911, 1912-1913, 1914-1915, 1916-1917, 1918-1919, 1920-1921, 1922-1923, 1924-1925, 1926-1927, 1928-1929, 1930-1931, 1932-1933, 1934-1935, 1936-1937, 1938-1939, 1940-

TRADE PACT IS NOW CONCLUDED WITH WEST INDIES

Ottawa.—Improved steamship service and mutual tariff preferences are the features of the Canada-British West Indies-Bermuda-British Guiana-British Honduras trade agreement, the full text of which was made public. The agreement, which is subject to the ratification of the Parliament of Canada, the colonial office and the governments of the other contracting parties, is for a period of 12 years, and will come into effect upon proclamation.

Canada, under the agreement, extends tariff preferences on bananas, cocoa beans, lime juice, limes, arrow root, coconuts, grape-fruit, pineapples, onions, cocoa butter, green coffee, pepper and spices, nutmeg, pineapple, sugar, marine sponges, angostura bitters. All goods other than tobacco, cigars, cigarettes and spirituous or alcoholic liquors, being produced or manufactured in any of the colonies mentioned, when imported to Canada, shall not, at any time, be subject to a tariff more than 50 per cent. of the duties imposed on similar goods under the general tariff of Canada.

Jamaica, The Bahamas, British Honduras, Barbados, Trinidad and British Guiana give Canada preference on flour, butter, cheese, lard, condensed milk, meats of all kinds, fish, apples and potatoes, boots, cement, prepared cocoa, confectionery, cordage.

Trying To Sell Government House

Alberta So Far Has Not Received Any Offers

Edmonton.—What is to be done about selling or keeping Government House is to be the subject of a report to the next session of the legislature when it re-assembles on a date yet to be definitely fixed. The government is now looking into the matter and Premier Greenfield, who was in the east when the invitation was issued to real estate dealers to make or get offers for the property, says this action is intended to carry out the wishes of the legislature by ascertaining what the chances are for a sale.

So far no offers have been received.

Britain Reducing Dole

Hopes New Government Bill Will Be Aid to Emigration

London.—There is going to be a cut of six and a half million pounds in the unemployment dole under the new government bill and labor is furiously attacking the government. The minister of labor under this measure will regain his power of discretion to allow or disallow benefit already extended, by which it is hoped to check the scandalous abuses and the glaring cases of married women drawing the dole and yet being unwilling to work.

The effect of the bill will be to reduce the number of men and women on the dole and to encourage emigration, which is today being seriously handicapped under the dole system.

New Game Law In Alaska

Non-Residents Must Be Accompanied By Licensed Guides

Seattle.—Beginning August 15, non-residents hunting game animals in Alaska must be accompanied by registered and licensed guides, the Alaska game commission has announced. Persons not licensed have been prohibited from guiding non-resident hunters. Formerly, licensed guides were required only for the Kenai Peninsula, between Cook Inlet and Prince William Sound, south of Anchorage, but the new ruling covers all Alaska.

Qualities Needed By Nurses Montreal.—Tact, sympathetic understanding, patience, gentleness, cheerfulness and discretion were the qualities of nurses, said Dr. E. M. Eberia, who delivered an address to graduating nurses of the city, but with all these virtues was needed a sense of humor. Without a sense of humor he did not think that either nurses or doctors could follow the path of duty in an arduous year.

W. N. U. 12885

More Single Men Are Convicted Of Crime

Toronto.—Judge Dymally is authority for the statement that nine men are convicted of crime to every woman, and single men are three times as prominent on the list as married. At the annual convention of the chief constables of Canada, Judge Dymally pointed out that when the attention of the home was not given to the children, they experienced harmful freedom in their actions. They found access to the movies easy and from lurid films gathered ideas which poisoned their minds.

Tornado Hits Minneapolis

Three Persons Killed and Much Damage to Property

Minneapolis.—Three persons were killed and at least 25 injured here when a wind and rain storm, striking with the force of a tornado, swooped down on Minneapolis, tore the roof off a section of a pavilion at Lake Harriet and buried nearly a score under the debris.

As the wind rushed through the city, the floor in a south Minneapolis restaurant gave beneath a half-dozen dinner guests, throwing them into the basement. None was seriously hurt, however. Store fronts were caved in by the wind, several houses damaged, trees uprooted, and traffic was tied up by flooded streets, as the sewers were unable to carry off the heavy rain. Basements of many houses were flooded.

The Alberta Crop

90,000,000 Bushels Wheat Crop Is Seen In 1925

Edmonton.—In the neighborhood of 90 million bushels is the Provincial Government's wheat crop estimate now. In view of present weather conditions, it indicates a drop from previous estimates made in various quarters, the explanation being that dry weather, weeds, pests and reduction in acreage through farmers moving have all combined to cut down the probable crop.

Hon. George Howland, minister of agriculture, now estimates the area seeded to wheat at 2,500,000 acres, and he puts the likely average yield at 17 bushels to the acre. This works out at 92,500,000 bushels, assuming that the present favorable conditions continue.

Italy Would Punish Speculators

Brand As Traitors Those Who Cause Financial Crisis

Rome.—Punishment of speculators as traitors to Italy was suggested by Deputy School of the Italy chamber, who asked Finance Minister Stefani what measures the government intended to take against those who caused the recent financial crisis in the country. He said those who bought foreign money needlessly, and thereby brought about depreciation of the lire, should be treated as traitors.

Suspend Death Sentence Moscow.—A Moscow dispatch to the Havas Agency says the Soviet Government has granted the request of the German Government for a suspension of the death sentence on two German students charged with plotting to kill Leon Trotsky and other Soviet leaders.

Hindenburg's Son Personal Adjutant Berlin.—Major Oscar Hindenburg, who, until his father's election as president of the German Republic, was stationed with the Hanover Cavalry School, has been transferred to the defence ministry. He has been posted as the president's personal adjutant.

Sign Arms Convention Geneva.—A representative of the German Government has signed the convention to limit traffic in arms, formulated by the recent arms conference here. Germany had previously signed the protocol against the use of poison gas in warfare.

The United States is the second gold-producing country in the world, the Transvaal being first and Canada third.

Mentioned For Railway Board

MR. JUSTICE W. F. A. TURGEON

In view of the impending equalization of freight rates by the railway commission, considerable influence is being exerted to have the vacancy in that board filled by a western man, and Mr. Justice W. F. A. Turgeon, of Regina, Saskatchewan, is being brought forward for the position, the Ottawa Citizen says.

Commander Maude Reaches Santa Barbara

Sailing to England From Victoria in Light Craft

Santa Barbara.—Commander Eustace B. Maude, British navy, retired, who set out from Victoria, B.C., two months ago, to sail alone to England in a 25-foot yawl, put into Santa Barbara harbor for provisions. He had not expected to land until he reached Panama, but was driven close to the coast recently by storms and decided to drop anchor here.

Victoria.—Commander Eustace B. Maude left here May 5 for England, in his 25-foot yawl. He is 74 years old.

The War In China Canton.—Continued anti-foreign agitation started an exodus of Canton business houses to the British settlement of Hong Kong, 95 miles distant. Predictions were made that hostilities would last six months.

Jack Miner and Tyrus R. Cobb Spend Vacations Together.

Jack Miner with some of his birds. Tyrus R. Cobb and Jack Miner in camp.

It is doubtful if, in Canada, there is a busier or better known man than Mr. Jack Miner, the Canadian naturalist, author and lecturer. In the United States the same is true of Mr. Tyrus R. Cobb, the world's greatest baseball player. Jack Miner is in his sixtieth year, while Ty Cobb is in his fortieth.

For thirty-nine consecutive years, Jack Miner has taken a month's holiday each fall to get away from his public and busy life and has never seen the first of November at home. Always during that month, he has travelled each time by the Canadian Pacific Railway to Northern Ontario and has camped by the track all the way between Mattawa, Quebec and Port Arthur, Ontario. Thus he has walked over this territory by day, and partly by night. I say by night because during these thirty-nine years he has found thirteen lost men, all of whom had been lost over a day and a night.

For twenty-nine years Jack Miner carried a gun, and no individual had a more complete collection of moose and deer heads than did he. So great were they that when the Canadian Pacific Railway were planning their exhibit for the World's Exposition

Provide Safeguards Against Bank Failures

Ottawa.—The occurrences on which charges were launched under the Bank Act of 1913, against the former directors of the Home Bank of Canada, and upon which they were recently found not guilty by decision of the Ontario Court of Appeal, could not, in our opinion, take place under the safeguards provided in the new act of 1925, without early detection. It was stated at the department of finance in commenting on an interview given by Attorney-General Nelles of Ontario, in which he declared no further criminal prosecution would be conducted against the directors.

To Develop Empire Trade

Is Object of Self-Supporting League Says Viscount Jellicoe

London.—The Self-Supporting Empire League, which has been on the stocks for six to eight months, had an enthusiastic launching at an inaugural luncheon, presided over by Viscount Jellicoe.

The objects of the league, Viscount Jellicoe explained, were to foster and develop the trade and industry of the empire, and to induce consumers to demand empire products, also to assist producers to meet the demands at reasonable prices at branches to be formed to encourage industries in their own immediate territories.

Among representing men from overseas, who gave the new movement their blessing, was Sir George Perley, former Canadian high commissioner in London, who said all loyal Canadians were ashamed that Canada had bought only ten shillings worth of commodities in Britain for over 21 years by Britain in the Dominions.

"Let the league give the lead," he said, "and Canada will enthusiastically follow."

Largest Motorship Launched Belfast.—A 22,000-ton motorship, the largest and most powerful of its type in the world, was launched at Queen Island, Belfast, and christened Asturias by the Duchess of Abercorn. The ship will trade with Argentina and Brazil.

It will accommodate 1,700 passengers.

DISSOLUTION OF PARLIAMENT MAY TAKE PLACE SOON

Ottawa.—Decision whether a general election is to be held this fall will not be reached till cabinet resumes business after the holidays. But the more speculatively inclined are offering six to four in favor of dissolution. During the two or three weeks of recess, there will be a sounding out of constituencies and a general survey of the country. The heavy Liberal defeat in Nova Scotia for a time checked the talk of dissolution and should New Brunswick follow suit, it is quite conceivable that there would be further delay in appealing to the polls. None the less, all parties have been organizing for some time past. Prospects of a bountiful harvest, coupled with good prices, are further taken as favorable to dissolution.

Some ministerial changes are due and should the government decide for a general election, there will be a cabinet re-organization with an appeal to the country on a new slate.

A whole series of appointments remain to be filled. There are vacancies in the senate; there is a vacancy on the railway commission; the post of Canadian minister at Washington, for which an appropriation is made by parliament year by year has never been filled. The resignation of Hon. P. H. Roy as Canadian commissioner in Paris has likewise been mentioned from time to time, rumor associating Hon. Dr. Beland, minister of soldiers' civil re-establishment with the appointment, should Mr. Roy decide to retire.

When it comes, the general election will be fought on the new distribution of seats. This will increase the membership of the House of Commons from 235 to 245. Nova Scotia will have two members less; British Columbia gets one member more; Manitoba two more; Saskatchewan five more; Alberta four more.

Wants India As Partner

Britain Anxious to Have Co-operation of Indian People

London.—Great Britain no longer "talks of holding the gorgeous east in fee, but asks India to march side by side with us in fruitful, harmonious partnership, which might create the greatest and proudest days of Indian history," declared the Earl of Birkenhead, secretary of state for India, in an important debate in the House of Lords.

Arguing that the 1919 act had not failed, but never had had a chance, because of the refusal of the nominal co-operation with the British, Lord Birkenhead continued that the door of acceleration was open, but only when "we see everywhere among responsible leaders of Indian thought the evidence of sincere and genuine desire to co-operate with us in making the best of the existing constitution."

He appealed to the Indian people with deepest sincerity for goodwill and co-operation.

"We shall not be signally bargained if we meet the generous friendship which is near and dear to our hearts," said the secretary of India.

Better Livestock Train Disbanded

Stock Was Sold to Farmers During Reginald's Southern Trip

Reginald.—The better livestock train, which has been travelling through the southern part of the province since June 10, has completed its itinerary and disbanded.

The train was organized by the department of agriculture in the Saskatchewan Government, with the co-operation of the Canadian Pacific Railway. The train was fully equipped for the exhibition of stock; the illustration of agricultural methods by means of moving pictures and lantern slides, and the giving of lectures on agricultural topics. In addition, a large percentage of the stock was sold to farmers in various districts, during the course of the trip.

Co-operate in Morocco Madrid.—France and Spain have signed an agreement for co-operation in Morocco against Abd-el-Krim's Rifian tribesmen, who refused to accept their authority.

Home Gardens Competition

In order to encourage the cul-
tivation of gardens and beautifica-
tion of our town, the Stony Plain
Women's Institute is offering
prizes under the following rules
and regulations:

Upon payment of 25c any per-
son may become a member of the
garden club.
Entrants to be judged on Mon-
day Aug. 19.
Points in garden and flower
competition—cleanliness 25, layout
15, quality maximum 10 points.
Flowers grown must include
sweet peas, pansies, nasturtiums,
snapdragons, poppies, mignonette.
Vegetables must include bush
beans, beets, carrots, lettuce, whole
turnips, stalked peas, 10 cabbage
plants, 10 hills potatoes.

This list of flowers and vege-
tables does not declare any person
from growing another variety of
flowers or vegetables but the above
standard will be that upon which
garden and flowers will be judged
and points awarded.

Any child or person competing
for prize money must reside and
exhibit within town limits.

Women's Institute will appoint
2 capable judges to inspect gar-
dens entered for competition.
Class A, children 12 to 16 years
inclusive to plant and grow for
vegetables to be planted in and
occupy a space equal to 15 feet
square. 1st prize \$4, 2d \$3, 3d \$1.

Class B, vegetables & flowers—
space limited to the property front-
age upon which a person resides
equal to width of lot or less. 1st
prize \$4, 2d \$3, 3d \$1.

Class C, vegetables & flowers
limited to the space of 2 50 ft. lots
or less, where exhibitor resides.
Classes B & C are for adults.
Entry in Class only permitted.

Zilliox & Kast,
Harness and Farm
Implements.

Here and There

"Earning accidents, we are not
the greatest wheat crop in the his-
tory of Canada," says Andrew Kelly,
of the Western Flour Mills. Mr.
Kelly thinks the prairie wheat crop
this year is off to the start it
ever had.

The first lot of Scottish boys en-
rolled as farm apprentices for Cana-
da arrived recently on the Cana-
dian Pacific "Liner," "Hielagauna."
They were brought out under the
auspices of the British Immigration
and Colonization Association in co-
operation with the Canadian Pacific
Railway.

Canada's progress in the world of
letters is illustrated by the fact that
there is a Canadian literary section
as one of the features of the Cana-
dian pavilion at the British Empire
Exhibition at Wembley. It presents
French-Canadian and English Cana-
dian literature from the earliest
dates down to 1924.

Ten conventions, comprising al-
most 3,000 delegates, will be held in
Montreal between now and August
31, according to an announcement by
the Montreal Tourist and Con-
vention Bureau. It is hoped to obtain
the 1926 Kiwanian Convention for
this city which would mean that
some 7,000 Kiwanians will visit
Montreal next summer.

The Crystal Gardens, the splendid
new pleasure resort for the city of
Victoria, B.C., will be opened at the
end of June and will form one of
the most attractive attractions of that city.
It will be both a winter and summer
garden and possesses a salt water
swimming tank, claimed to be the
largest on the continent. Citizens of
Victoria are already using the Gar-
dens prior to its official opening.

Screening at the Capitol Theatre,
Montreal, of the scenes through
which the University of Montreal
across-Canada trip and the similar
journey of the Teachers' Federation
of Canada will pass, attracted a
large and appreciative audience.
The film was a revelation of the
beauty of Canadian cities and scenery.
The University of Montreal
trip will start from that city July 7
and will return July 28. The trip
of the Teachers' Federation will com-
mence July 20 and will conclude
August 10.

Frank W. Ashby, secretary of the
Manufacturers' Association of Aus-
tralia, a recent visitor at Banff, said
he found Canada to have a most de-
lightful climate and "scenery which are
more modern than our own."
Mr. Ashby said the impression in Aus-
tralia had been that Herschel Island
and Baffin's Bay were linked up
municipally with Montreal and Win-
nipeg, and thought that the best way
to correct these geographical miscon-
ceptions was to encourage more tour-
ist travel from other parts of the
Empire.

That 44 beer now selling in the
Province of Ontario had met with
approval and was considered quite
satisfactory by people of the prov-
ince was the statement of Premier
Q. Howard Ferguson prior to his
departure recently for England on
the Canadian Pacific liner "Empress
of Scotland." Mr. Ferguson will en-
deavour to interest British and for-
eign capitalists in the industrial de-
velopment of Ontario province.

W. J. Uren, Assistant General
Superintendent, Quebec District,
Canadian Pacific Railway, recently
presented thirty employees of the
system with certificates of First
Aid, covering first to fourth year
work. Mr. Uren said about thirty
per cent of Canadian Pacific Rail-
way employees had passed examina-
tions in First Aid and he was grati-
fied to think that no accident could
occur on the system without the high
probability of there being some per-
son on the spot who could afford ex-
pert First Aid.

Riding in Canadian Rockies: A Growing Summer Diversion

TRAIL RIDERS HONORING
TOM WILSON

TRAIL RIDERS IN CANADIAN ROCKIES

Albert H. MacCarthy, will return
in time to report to the Alpine Club
Lake O'Hara has been painted
by the late John Singer Sargent
and by Carl Knappius and Richard
M. Kimbel. The two latter are
New York artists and members of
the artist colony that summers at
Banff. Lake O'Hara threatens to
rival Lake Louise whose close neigh-
bor it is.

The Alpine Club's main objective
this year is to climb Mt. Good-
win, the highest peak visible from
the Canadian Pacific Railway, and
the ascent will be made from a
sub-pass.

Last year's initial Pow-Wow of
the Trail Riders of the Canadian
Rockies was held in Yoho Valley
near Field, B. C. Two days of trail
riding and social gathering in a big
lodge in the evenings were enjoyed by
more than 200 in numbers and notice
the latter qualifying for membership
one of the requirements of which is to
have ridden fifty miles over Cana-
dian Rockies' trail. Dr. Charles
D. Watson of the Smithsonian Insti-
tute at Washington D. C. is the
honorary president of the Trail
Riders order.

Several hundred trail riders are
expected to take part in this year's
meeting, which will be held Aug.
8-10 inclusive. The start will be
from Banff and Lake Louise by
motor to Marble Canyon where the
horses and guides will be in wait-
ing for the three days ride. Program
is as follows: first night, tent camp
on Goodwin Plateau, 6,500 feet above
the valley; second night, tent camp on
the shore of Lake O'Hara; third night,
Lake Louise in beauty, but of a wilder
type; third night, Tipt Camp beside
Lake Wapta and Fox-Wow held in
Sun-Dance Lodge. There will be a
sing-song each night in camp.

Riders must bring either a sleeping
bag or two warm blankets. A change
of underwear and warm coat or
mackinaw for the hours around a
camp fire, is all the equipment that is
necessary. No trips will be accepted.
One pack horse for each three riders.
A word of caution, unless one is pre-
pared to rough it he should not ride
but if one deludes in the feet of
mud and pony, he or she, may be
left in the lurch.

The Rocky Mountain Guide
Association, an organization of
the guides in the territory,
has headquarters at Banff, is in
charge of the arrangements for
and guides.

at Reasonable Prices.

CARL FISCHER.

Stony Plain and District.

Miss R. Wolf, Edmonton,
spent the weekend with her
parents, at Glory Hills.

Miss Muriel Michael under-
went a minor operation at
the Royal Alexandra hospi-
tal on Monday and is mak-
ing good recovery.

Martin's Orchestra held a
very successful dance at
Spruce Grove last Thursday
which was well patronized.
The same parties will give a
dance in Stony next Tuesday
night.

The dance Saturday night
in the new barn on the Gitzel
ranch south of town drew a
big crowd of friends and
neighbors who all had a good
time.

Mr E. Willock, who farmed
for a number of years in the
Manyberries district in south-
eastern Alberta and came up
to northern Alberta in the
spring, held a clearance sale
at Duffield yesterday of his
stock and chattels. Mr Wil-
lock a short time ago bought a
quarter of land in section 1-
51-2w5, but changed his mind
about farming here this sea-
son, and moves out to the
Coast with his wife, his week
and intends remaining there
until the spring of 1928.

Mr. Reel, weed inspector
for the Department of Agri-
culture has been giving the
crops in this district the
"once over" for the appear-
ance of the pest. Some com-
plaint has been made that the
worst pests were imported in-
to the district at the time of
the hay scarcity 5 years ago,
when many tons were up from
the East and from across the
border.

Mr and Mrs Percy Bisset,
the Newby-weds, gave an in-
vitation dance to their Hol-
born friends in the hall last
Friday night. All old friends
were present.

Alice and Olga Bergstrom,
of Melville, Sask., are visit-
ing this week with friends at Hol-
born.

The Holborn U.F.W.A. are
holding a dance July 31, at
Holborn Hall. Guessing con-
test for home-made quilt; 25c
a guess. Barth's orchestra.
Ladies please bring cake. Ev-
erybody welcome.

The reports from this dis-
trict are that there will be
this season the finest hay crop
on record. Quite a number
of farmers have commenced
cutting this week.

Talking about crop reports,
old Dr. Werner predicts a
careless summer, providing
you see him about those grow-
ings on your toes.

Lost, auto plate No. 37-550.
Kindly notify The Sun.

C. N. express money orders
are now on sale at Clarke's
Drug Store.

Card of Thanks.

Mrs Klapper and family
wish to thank neighbors and
friends and especially the di-
rectors of the Agricultural So-
ciety, for their kind sympathy
shown to them during their
recent bereavement.

Card of Thanks

Mr and Mrs V.L. Kellog
wish to thank the citizens of
Stony Plain for their splendid
turnout and kind assistance
in recovering their child who
was lost last week.

Stony Plain and District.

Mr and Mrs Loew, Cardston,
are visiting this week with Mr
and Mrs Michael.

Stony was well represented
at the Edmonton Ex. yester-
day; large delegations going
in from the town and district.

While Mary, the young
daughter of Mr and Mrs Ph
Trapp was coming along Sec-
street near Main street, on
Monday morning, with two
bottles of milk her foot caught
in a broken plank in the side-
walk, throwing her down,
one bottle breaking a jagged
piece entering her body on
the right side, making a nasty
wound. She was removed to
her home, the injuries being
attended to by Dr Walton.

Vacant houses are now at
a premium in Stony Plain.
A young man by the name of
Bery entered the Sun Office
Tuesday and wanted to rent
the Editor's apartments "for a
young couple."

Mr Wm Goebel met with
an accident Tuesday night
while driving a car on the
Baseline, east of the Grove.
He was coming along at a fair
rate of speed when the car
ran into some loose sand and
twisted the steering rod from
his hands, dumping the car.
Bill's left arm was twisted be-
hind him, tearing the liga-
ments pretty badly. His in-
juries were attended to by
Dr Walton. Bill was taken to
Edmonton yesterday.

A demonstration of road-
making will be held on Wed-
nesday afternoon next, from
Ursel's corner N. An Adams
grader and a Rumely oil pull
engine will be used, with an
Adams man in charge.

The big attraction of Ed-
monton to-morrow night is
the Liberal convention for the
purpose of nominating a can-
didate for West Edmonton in
the House of Commons at the
election predicted to be held
in October next.

Barth's orchestra played an
engagement in Edmonton on
Monday night, and will play
at the dance at Holborn Hall
tomorrow night.

Sporting Notes.

On July 8 Stony's junior
ball team went to Rosenthal
and gave them a good game.
With J. Manary in the box,
the game went on well. It cer-
tainly was tough luck for the
Rosenthal spectators to watch
their senior team lose to the
Stony Juniors. Score: Stony
19, Rosenthal 11. Batteries—
Mohr and Miller; Manary and
Shaul.

A big crowd of Stony's
sportsmen will make the trip
to Duffield Wednesday next,
when Duffield Athletic Ass'n
will pull off their annual
sports.

A combination ball team
from Stony played the Grove
team Thursday night and beat
them 8 to 5.
